

300 mW Dual Surface Mount Zener Diodes

Features

- SOT–23 surface mount package
- 300 mW power dissipation rating
- Ideally suited for automatic insertion
- ΔV_Z for both diodes in one case is $\leq 5\%$
- Common anode style available see AZ series

94 8550

Absolute Maximum Ratings

 $T_j = 25^\circ\text{C}$

Parameter	Test Conditions	Symbol	Value	Unit
Power dissipation	on fiberglass substrate	P_d	300	mW
Junction and storage temperature range		$T_j = T_{stg}$	$-55...+150$	$^\circ\text{C}$

Maximum Thermal Resistance

 $T_j = 25^\circ\text{C}$

Parameter	Test Conditions	Symbol	Value	Unit
Junction ambient	on fiberglass substrate	R_{thJA}	420	K/W

Type DZ23C...	Marking	V_Z V	Z_{ZT} Ω	Z_{ZK} Ω	T_C %/°C	V_R V
		@ $I_{ZT}=5\text{mA}$	@ $I_{ZT}=5\text{mA}$	@ $I_{ZT}=1\text{mA}$		@ $I_R=0.1\mu\text{A}$

47	KVV	44 to 50	100	750	+0.110	35.0
51	KVW	48 to 54	100	750	+0.110	38.0

1) Device on fiberglass substrate

2) Tested with I_{ZT} current pulses. Pulse width = 5 ms.

Case: SOT23, molded plastic

Mounting position: any

Approx. weight: 0.008 grams

Ozone Depleting Substances Policy Statement

It is the policy of **Vishay Semiconductor GmbH** to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems
with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay-Telefunken products for any unintended or unauthorized application, the buyer shall indemnify Vishay-Telefunken against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.
